

COMPANY OVERVIEW

Samuels Enterprises, LLC provides senior-level solution architecture, enterprise application design, systems integration, modernization and technical consulting. Led by **Ewing Redmond Samuels III**, Principal Solution Architect, the practice draws on **20+ years of enterprise technology experience** across government, healthcare, education, financial services and complex enterprise environments.

Engagements can span discovery and requirements through architecture, prototyping, implementation planning, integration, production support, modernization and technical leadership.

CORE CAPABILITIES

ECM - Enterprise content/document management, repositories, capture, search, imaging and content services
Automation - OCR/ICR, IDP, classification, extraction, indexing, workflow and business-process automation
Records - Retention, information governance, audit support, lifecycle controls and records-oriented architecture
Communications - Document generation, correspondence, statements, transactional output and template modernization
Modernization - Legacy assessment, migration, integration, application modernization and platform transition
AI - AI-assisted engineering, enterprise intelligence, entity resolution, search, analytics, evidence/provenance and decision-support systems

TECHNOLOGY & PLATFORMS

Platforms: OpenText / Documentum, ApplicationXtender, IBM FileNet, Kofax / Tungsten, PeopleSoft, Microsoft SQL Server, Oracle, SharePoint and related enterprise platforms.
Engineering: Java, .NET, C#, C++, PHP, JavaScript, HTML/CSS, SQL, Windows Server, Linux, Citrix, VMware, Hyper-V, APIs, data modeling, search and workflow.
Training / Credentials: ITIL Foundation; Microsoft MCSA, MCP, MCSE; selected Kofax Capture, Transformation Modules, Analytics, TotalAgility and MarkView training.

SELECTED PUBLIC-SECTOR EXPERIENCE

Selected public-sector experience of the Principal includes support for municipal and agency technology environments such as:
City of Los Angeles • City of San Clemente • City of Vista • City of Oceanside • City of Lake Forest • Rancho California Water District • City of San Diego • Long Beach Police Department • Orange County Sheriff's Office • and additional public-sector organizations.

Representative names reflect prior professional project/support experience of the Principal and are not presented as current Samuels Enterprises clients or endorsements.

REPRESENTATIVE EXPERIENCE

Enterprise Delivery: Requirements discovery, process analysis, architecture definition, implementation planning, stakeholder communication, project tracking, risk analysis, testing, SIT/UAT, production deployment and Tier 1-Tier 4 support.

Current Engineering: Modular enterprise intelligence applications spanning acquisition, parsing, normalization, entity resolution, scoring, search, alerts, evidence, provenance, workflow, analytics and reporting.

Industry Breadth: Government, healthcare, education, financial services, content/document operations, enterprise support and cross-domain intelligence systems.

WHY SAMUELS ENTERPRISES

Architecture + hands-on engineering - strategy backed by working technical implementation.

Legacy + modern systems - experience bridging established enterprise platforms and current AI-enabled architectures.

Business-to-technology translation - operational requirements converted into deployable systems and workflows.

Flexible engagement - remote international consulting, project-based advisory and C2C through Samuels Enterprises, LLC.

Demonstrable capability - current enterprise architecture and application engineering reinforce long-term production experience.

ENGAGEMENT MODELS

Solution Architecture • Technical Advisory • Assessments • ECM / Automation
Modernization • Migration Planning • Enterprise Integration • Prototype /
Proof-of-Concept • Production Support • Technical Leadership • C2C Consulting
